| Delgado R, 79         |  | Samama MM, 87                    | Ziche M, 337                   |

## CUMULATIVE TABLE OF CONTENTS

### Number 1

#### A CRITICAL APPRAISAL OF THE USE OF ANTICOAGULANT THERAPY: EFFECTIVENESS, MONITORING, AND COMPLICATIONS Jack Hirsh and Mark N. Levine

- Mechanism of Action and Monitoring of Anticoagulants, Jack Hirsh, 1
- Laboratory Control of Anticoagulant Therapy, Leon Poller, 13
- Effectiveness of Anticoagulants, Jack Hirsh, 21
- Hemorrhagic Complications of Anticoagulant Therapy, Mark N. Levine and Jack Hirsh, 39
- Heparin-Induced Thrombocytopenia, John G. Kelton and Mark N. Levine, 59
- Nonhemorrhagic Complications of Anticoagulant Therapy, Mark N. Levine, 63
- Risks and Benefits of Anticoagulant Therapy, Mark N. Levine, 67
- Abstracts of Current Literature, Genesio Murano and Rodger L. Bick, 73

### Number 2

#### HEMOSTASIS AND ATHEROSCLEROSIS Orhan N. Ulutin, M.D.

- Introductory Historical Remarks on Atherosclerosis and Hemostasis, Orhan N. Ulutin, 77
- Monocyte-Macrophage Participation in Atherogenesis: Inflammatory Components of Pathogenesis, Colin J. Schwartz, Anthony J. Valente, Eugene A. Sprague, Jim L. Kelley, C. Alan Suenram, Dana T. Graves, Marius M. Rozek, Ellen H. Edwards, and Ruby Delgado, 79
- Inhibitors of Coagulation, Atherosclerosis and Arterial Thrombosis, Jacqueline Conard and Meyer M. Samama, 87

- Fibrinolytic System in Atherosclerosis, Sengün Balkuv-Ulutin, 91
- Molecular Markers of Hemostatic Activation in Atherosclerosis: A New Concept in Diagnostic Profiling of Endogenous Pathophysiologic Transition, Jawed Fareed, Jeanine M. Walenga, William H. Baker, Andrew Hayes, and Debra A. Hoppensteadt, 102
- Detection of Prethrombotic States in Patients with Atherosclerotic Lesions, Klaus Breddin, 110
- Role of Platelets in Atherosclerosis, Helmut Sinzinger, 124
- Antiplatelet Drugs in the Management of Patients with Thrombotic Disorders, Laurence A. Harker, 134
- Atherosclerosis and Hemostasis, Orhan N. Ulutin, 156
- Abstracts of Current Literature, Genesio Murano and Rodger L. Bick, 175

### Number 3

#### CELLULAR EVENTS MEDIATED BY THROMBIN AND RELATED PROTEINASES: PART ONE John W. Fenton II and Jawed Fareed

- Postclotting Fates of Thrombin, Walter H. Seegers, 181
- Thrombin-Induced Endothelial Injury, Asrar B. Malik, 184
- Implication of Thrombin Formation on the Endothelial Cell Surface, Peter P. Nawroth and David M. Stern, 197
- thrombin Active-Site Regions, John W. Fenton II and David H. Bing, 200
- Human  $\alpha$ - and  $\gamma$ -Thrombin Inhibition by Trypsin Inhibitors Supports Predictions from Molecular Graphics Experiments, Yoshiaki Sugawara, Jens J. Birktoft, and Lawrence J. Berliner, 209
- Acetylation of Antithrombin III by Aspirin, German B. Villanueva and Nancy Allen, 213

## CUMULATIVE TABLE OF CONTENTS

### Number 1

#### A CRITICAL APPRAISAL OF THE USE OF ANTICOAGULANT THERAPY: EFFECTIVENESS, MONITORING, AND COMPLICATIONS Jack Hirsh and Mark N. Levine

- Mechanism of Action and Monitoring of Anticoagulants, Jack Hirsh, 1
- Laboratory Control of Anticoagulant Therapy, Leon Poller, 13
- Effectiveness of Anticoagulants, Jack Hirsh, 21
- Hemorrhagic Complications of Anticoagulant Therapy, Mark N. Levine and Jack Hirsh, 39
- Heparin-Induced Thrombocytopenia, John G. Kelton and Mark N. Levine, 59
- Nonhemorrhagic Complications of Anticoagulant Therapy, Mark N. Levine, 63
- Risks and Benefits of Anticoagulant Therapy, Mark N. Levine, 67
- Abstracts of Current Literature, Genesio Murano and Rodger L. Bick, 73

### Number 2

#### HEMOSTASIS AND ATHEROSCLEROSIS Orhan N. Ulutin, M.D.

- Introductory Historical Remarks on Atherosclerosis and Hemostasis, Orhan N. Ulutin, 77
- Monocyte-Macrophage Participation in Atherogenesis: Inflammatory Components of Pathogenesis, Colin J. Schwartz, Anthony J. Valente, Eugene A. Sprague, Jim L. Kelley, C. Alan Suenram, Dana T. Graves, Marius M. Rozek, Ellen H. Edwards, and Ruby Delgado, 79
- Inhibitors of Coagulation, Atherosclerosis and Arterial Thrombosis, Jacqueline Conard and Meyer M. Samama, 87

- Fibrinolytic System in Atherosclerosis, Sengün Balkuv-Ulutin, 91
- Molecular Markers of Hemostatic Activation in Atherosclerosis: A New Concept in Diagnostic Profiling of Endogenous Pathophysiologic Transition, Jawed Fareed, Jeanine M. Walenga, William H. Baker, Andrew Hayes, and Debra A. Hoppensteadt, 102
- Detection of Prethrombotic States in Patients with Atherosclerotic Lesions, Klaus Breddin, 110
- Role of Platelets in Atherosclerosis, Helmut Sinzinger, 124
- Antiplatelet Drugs in the Management of Patients with Thrombotic Disorders, Laurence A. Harker, 134
- Atherosclerosis and Hemostasis, Orhan N. Ulutin, 156
- Abstracts of Current Literature, Genesio Murano and Rodger L. Bick, 175

### Number 3

#### CELLULAR EVENTS MEDIATED BY THROMBIN AND RELATED PROTEINASES: PART ONE John W. Fenton II and Jawed Fareed

- Postclotting Fates of Thrombin, Walter H. Seegers, 181
- Thrombin-Induced Endothelial Injury, Asrar B. Malik, 184
- Implication of Thrombin Formation on the Endothelial Cell Surface, Peter P. Nawroth and David M. Stern, 197
- thrombin Active-Site Regions, John W. Fenton II and David H. Bing, 200
- Human  $\alpha$ - and  $\gamma$ -Thrombin Inhibition by Trypsin Inhibitors Supports Predictions from Molecular Graphics Experiments, Yoshiaki Sugawara, Jens J. Birktoft, and Lawrence J. Berliner, 209
- Acetylation of Antithrombin III by Aspirin, German B. Villanueva and Nancy Allen, 213

**Protease Nexins and Cellular Regulation**, Joffe B. Baker, and Robert S. Gronke, 216

**Metabolism of Antithrombin III - Protease Complexes by Various Cells in Culture**, Naphtali Savion, 221

**A Three-Dimensional Model of a Unique Proteinase Inhibitor:  $\alpha_2$ -Macroglobulin**, Steven R. Feldman and Salvatore V. Pizzo, 223

**Thrombin Binding to Fibrin is Necessary for Fibrin Polymers to Enhance Factor XIIIa formation**, Charles S. Greenberg, Komandoor E. Achyuthan, and Charles C. Miraglia, 226

**Rapid Release and Deactivation of Plasminogen Activators in Human Endothelial Cell Cultures in the Presence of Thrombin and Ionophore A23187**, F.M. Booyse, R. Bruce, D. Dolenak, M. Grover, and L.C. Casey, 228

**Double-Signal Hypothesis for Thrombin Initiation of Cell Proliferation**, Darrell H. Carney, Gloria J. Herbosa, Janet Stierberg, John S. Bergmann, Eric A. Gordon, David Scott, and John W. Fenton II, 231

**Thrombin and Trypsin Activate Phospholipase C in Human Platelets via a Proteolytic-Mediated Pathway**, Marco Ruggiero and Eduardo G. Lapetina, 241

**Biologic Activities of Nonenzymatic Thrombin: Elucidation of a Macrophage Interactive Domain**, Rachel Bar-Shavit and George D. Wilner, 244

**Subcellular Localization of Platelet Elastase and its Retention During the Release Reaction**, Harold L. James, Prance L. James, Richard G. Painter, Karen Zahler-Bentz, and Allen B. Cohen, 250

**Thrombin Binding and Stimulation of Cyclic Guanosine Monophosphate Formation in Neuroblastoma Cells**, R. Michael Snider, Michael McKinney, and Elliot Richelson, 253

**Abstracts of Current Literature**, Genesio Murano and Rodger L. Bick, 263

#### Number 4

#### CELLULAR EVENTS MEDIATED BY THROMBIN AND RELATED PROTEINASES: PART TWO

John W. Fenton II and Jawed Fareed

**Modulation of Smooth Muscle Responses by Serine Proteases and Related Enzymes**, Jawed Fareed, Gisela Kindel, and Arvind Kumar, 265

**Interactions of Triglyceride-Rich Lipoproteins with Receptors: Modulation by Thrombin**, Sandra H. Gianturco and William

A. Bradley, 277

**Complement Activation After Aortic Endothelial Injury**, Paul S. Seifert, James L. Catalfamo, and Jean Dodds, 280

**Antitumor Action of Crotalase, A Defibrinogenating Snake Venom Enzyme**, Francis S. Markland Jr., 284

**Thrombin Stimulates Arachidonate Metabolism in Murine Tumor Cells**, M.G. Lampugnani and M.B. Donati, 291

**Proteolytic Enzymes in Cancer Invasion and Metastasis**, Ronald H. Goldfarb and Lance A. Liotta, 294

**Role of Neutral Serine Proteases in Tumor Cell Lysis by Natural Killer Cells (Large Granular Lymphocytes) and Activated Macrophages**, Ronald H. Goldfarb, 308

**Coagulant Versus Amidolytic Properties of Human and Bovine Thrombins: Implications in Standardization and Diagnostic Usage**, Jawed Fareed, Jeanine M. Walenga, Lars G. Svendsen, and Edward W. Bernes Jr., 310

**Evaluation of Thrombin Activity by Immunoquantitation of Fibrinopeptide A Generation**, R. Martin Emanuele, Jawed Fareed, Jeanine M. Walenga, Debra Hoppensteadt, and John W. Fenton II, 318

**Lack of Relationship Between Enhanced Bleeding Induced by Heparin and Other Sulfated Polysaccharides and Enhanced Catalysis of Thrombin Inhibition**, Michael R. Buchanan, Frederick A. Ofori, Francoise Fernandez, and Joanne Van Ryn, 324

**Functional Determination of Antithrombin III in Clinical Samples and Therapeutic Concentrates**, Jawed Fareed, Jeanine M. Walenga, Lars G. Svendsen, and Edward W. Bernes Jr., 328

**Degradation of Glycoprotein and Collagenous Components of the Basement Membrane: Studies with Urokinase-Type Plasminogen Activator,  $\alpha$ -Thrombin, and Plasmin**, Ronald H. Goldfarb, Genesio Murano, R. Brundage, G.P. Siegel, V. Terranova, S. Garbisa, and Lance A. Liotta, 335

**Plasminogen Activators (Urokinase) Mediate Neovascularization: Possible Role in Tumor Angiogenesis**, Ronald H. Goldfarb, Marina Ziche, Genesio Murano, and Lance A. Liotta, 337

**Abstracts of Presentations or Posters of the Symposium on "Cellular Events Mediated by Thrombin and Related Proteinases,"** 339

**Concluding Remarks**, Sol Sherry, 346

**Author Index and Cumulative Table of Contents**, 348
